

Integrity (Bhavika Joshi):

- This week we had two meetings. In those, we discussed about the progress done so far and designing of the system that is a weekly task.
- I made sure that each team member followed a holistic approach. Honesty and respect were maintained throughout the week. I saw to it that each member suggested the changes with honesty and the team members took care that they did not hurt the integrity of others' code.
- I made sure that each member got proper credit for her work. Also, I made sure that our team was working in synchronization with each other so that we could easily keep track of the progress done so far.
- Various changes were made in the designing activity but integrity was maintained. I saw to it that each member got equal opportunity to share her idea and every idea earned its due respect.
- This week also we maintained backups and easy recovery.
- We have continued the use of version control to prevent errors.
