Integrity (Bhavika Joshi)

- During this week meetings, all team members have maintained universal approach for creating further designs.
- In the first meeting, we have followed transparent approach for creating week plan and to move ahead towards development activity.
- This time, we have created two diagrams Data Flow Diagram and State Diagram by having deep discussions with each team members.
- To maintain integrity and accuracy, we made two sub teams of two to create one diagram to have clear idea then we created final diagrams.
- During this week, we have developed data flow diagram and state diagram to make our further implementation easy and according to the given time constraints.
- I made sure that all team members can express their ideas with open mind and discussion should be to the point.
- I made sure that all team members maintain consistency and trustworthiness of their personal work and also the same for other team members.
- I made sure that all discussions should be translucent and all team members should respect thoughts of each other.
- We continued to use version control approach to prevent unwanted errors.
- Up to this week, all team members have followed lustiness and worked according to the decided approach and I will make sure the same will be followed.
